EMPLOYMENT HISTORY

Chapter Three | Senior Developer February 2021 - Present

A long-time **Drupal development agency**, Chapter Three has been a great look at how technological development can drive **new products** and tools for clients of every size. While at Chapter Three I have worked on the **Bay Area Rapid Transit** site, developed a **map system for the Shops at Santa Anita**, and worked to migrate and update both the **legacy Docusign** and **National Association of Realtor** sites.

- Support and integration of various content management systems and integrations with modern software frontends and backends.
- Multi-faceted client-facing work and interaction.
- Complex front-end Javascript and rapid prototyping.
- Extensive accessibility development and testing to ensure end-user experience.

Phase2 | Senior Developer/Tech Lead October 2014 - February 2021

Working with a medium-sized, nation-wide web application company brought a lot of experience in a wide variety of areas. Although Phase2 is mostly known for its **Drupal work**, it also gave me my first **experiences in managing other developers**, as well as introduced me to React, Tailwind, and **a number of other frontend frameworks** that I otherwise would not have had a chance to learn. **Twitter**, the **Department of Energy**, and the **Bill & Melinda Gates Foundation** are just a few clients I worked with.

OpenSourcery | Drupal Developer March 2014 - October 2014

With a deepened understanding of a powerful platform, in six months I learned more than ever expected about **Drupal's capabilities and modularity**. Along the way I was able to work with several exciting clients, such as **Princeton University** and **United Way of the Columbia-Willamette**.

Kosmos Central, LLC | Developer, Lead Developer September 2010 - February 2014

As my first full-time development job, Kosmos Central saw my first forays into PHP, **server-side Javascript**, MySQL, and **ecommerce**. The many different areas that Kosmos does business provided endless opportunities for new tasks and techniques to learn, and for skills to grow beyond expectation. Clients included Boston's **Lekker Home**, the **Portland Children's Museum**, and **Bob's Red Mill**.

EDUCATION

University of Idaho | Bachelor of Science 2010

Emphasis in virtual technology and design.

THOUGHT LEADERSHIP

We Need to Talk about Documentation/How to Write Better Technical Documentation:

A series of Phase2-branded blog posts discussing why documentation is so important and how everyone can contribute.

Design Implementation Guild:

A study group/rant session/meetup that I founded and ran for developers to discuss methodologies, resources, and pain points.

SKILLS

- Next.js
- ES6
- NodeJS
- jQuery
- React
- CSS
- SCSS
- Tailwind
- Typescript
- Gulp
- Grunt
- PHP
- Twig
- MySQL
- Angular
- Vue
- GraphQL
- REST
- API implementation
- Project leadership
- Client communication
- Goal estimation and accountability
- Technical management
- Mentorship
